Ad Specifications

Photographs & Artwork In order to produce a quality publication, it is important to provide original photographs and artwork. Copies of photos (including some scanned photos) may look good to the human eye or on your computer screen, but will not result in a quality printed image in the *Newsletter*. Digital photographs and artwork should be 300 dpi at the size or larger than the size that you wish to use them. Artwork may need to be scanned at 600 dpi. PDF, TIF, or JPG formats are preferred. Poor-quality copies and low-resolution digital images may be rejected. If you have any questions regarding the quality of your photograph or digital image, please contact the Advertising Editor. You should submit digital photographs and artwork as separate files. Embedding them in a Word file is fine for showing the desired layout, but you still need to submit the image files separately. Scanning your photographs to illustrate placement in your advertisements is optional.

Include your name and address, and each dog's name on the back of all photographs. Indicate placement on the page when there is more than one photograph per page. You may find it helpful to write on a label and then affix

that to the back of the photograph, as bearing down to write on the back of photographs may ruin them.

Photo Credits Include a photo credit in the actual advertising copy for each picture. The Board of Directors of the Pembroke Welsh Corgi Publications of America will not allow inclusion of pictures in the *Newsletter* without proper photo credit.

Package your photographs carefully with firm backing. Label packages clearly with "Photo – Do not bend."

Photographs and artwork will be returned. No photos will be returned to anyone other than the advertiser. However, neither the *Newsletter* staff nor the publisher is responsible for lost materials. Every attempt will be made to return materials in good order.

Margins The standard advertising space for a page is 7.5" x 9.5". Full bleeds require an additional quarter-inch outside the actual 8.5" x 11" page size (i.e., 9" x 11.5"), but the "safe" area for critical type and artwork is still 7.5" x 9.5". Any critical type and artwork closer to the 8.5" x 11" page size may be cropped off in production.

Fonts Limiting your ad to one or two fonts will result in a more professional appearance. Please include the name of the font with your ad. Font substitution may occur, but every effort will be made to substitute a comparable font.

Questions Contact the Advertising Editor, Sue Vahaly, with any questions regarding the layout of your advertisement. Every effort will be made to assist you to assure your ad is of high quality. Your support of the PWC *Newsletter* is appreciated.
